## Summary

Experienced Frontend Developer with 1 year and 10 months of expertise in HTML, CSS, Sass, Bootstrap, JavaScript, React.js, Redux, Next.js, Node.js, Express.js, and MongoDB. Demonstrated remarkable teamwork and communication skills, fostering effective collaboration and delivering high-quality results. Exceptional interpersonal abilities, easing communication with diverse stakeholders. Proven track record of successfully executing frontend projects, ensuring seamless user experiences. Seeking opportunities to leverage technical proficiency and interpersonal strengths to drive impactful solutions.

## Experience

**React frontend developer • Cantilever Labs**                    Jul 2022 - Apr 2023

- Proficient in HTML, CSS, Bootstrap, SASS, JavaScript, React.js, Redux, Material UI, React Bootstrap, Axios, pagination, and REST API
- Utilized HTML, CSS, and Bootstrap to design and develop responsive and visually appealing web pages
- Implemented SASS to improve the efficiency and maintainability of the CSS codebase
- Developed interactive web applications using JavaScript, React.js, and Redux for enhanced user experience
- Integrated Material UI and React Bootstrap components to create intuitive and user-friendly interfaces
- Utilized Axios for seamless data fetching and handling API requests
- Implemented pagination functionality to efficiently display and navigate large sets of data
- Developed and consumed REST APIs to enable data communication between the front-end and back-end
- Collaborated with a team to deliver high-quality web applications
- Continuously learned and implemented new technologies to stay up-to-date with industry standards.

**Web developer • Arkarz internet pvt ltd**                    Jan 2021 - Dec 2021

• Developed responsive web pages using HTML, CSS, Bootstrap, and JavaScript for various clients, ensuring alignment with their specific needs.
• Identified and resolved bugs and issues in existing websites, resulting in improved functionality and enhanced user experience.
• Collaborated closely with clients to understand their requirements and created customized websites that met their exact specifications.

## Education

**Msc(IT) • Late Pandhrinath Patil institute Mahavdiyalay Aurangabad**        Jun 2021 - Feb 2023

Computer Science

**Bachelor of computer science · Vasantrao naik college  Aurangabad**     **Jun 2017 - Feb 2020**
Computer Science · Grade: 70.43%

---

# Projects

**E-commerce App**                                                                          **Aug 2023 - Oct 2023**

- Developed a cutting-edge ecommerce app utilizing React JS, Redux, MUI icons, and Sass.

**Youtube Clone**                                                                           **Jun 2023 - Jul 2023**

- Developed a YouTube clone utilizing React JS, SASS, React Bootstrap, and MUI frameworks.

**Movie Search App**                                                                        **May 2023 - May 2023**

- Developed a Movie Search app using React.js, Node.js, Express.js, Axios, and MongoDB
- Implemented a user-friendly interface allowing users to search for movies and retrieve relevant information
- Utilized Axios for making API calls to retrieve movie data from external sources

**CRUD App**                                                                                **Apr 2023 - Apr 2023**

- Developed a CRUD (Create, Read, Update, Delete) application using the MERN (MongoDB, Express.js, React.js, Node.js) stack.
